

SCHEDULE

Thursday, October, 10th

8.30 - 8.50 - Registration and payment

8.50 „Opening Ceremony” + general informations (G. Pieńkowski, J. Grabowski, W.A.P. Wimbledon)

9.10 **Wimbledon William A.P.** - Progress with Berriasian correlations between southern Ukraine and western Tethys

9.30 **Arkadiev Vladimir** - New data on the Berriasian of Central Crimea: Biostratigraphy

9.50 **Guzhikov Andrey** - New data on the Berriasian of Central Crimea: Magnetostratigraphy

10.10 **Bakmutov Vladimir** - Palaeomagnetic study of Feodosia outcrop, eastern Crimea

10.30 – 11.00 Coffee Break

11.00 **Gusev Vladimir** - The possibility of holding of another Meeting of the Workshop of the Berriasian Working Group in Samara region, Russia

11.20 **Rogov Mikhail** - Significance of the ammonite genus *Volgidiscus* for Panboreal correlation of the uppermost Volgian and evolution of the Subcraspeditinae subfamily (Ammonoidea, Craspeditidae)

11.40 **Barski Marcin, Smoleń Jolanta & Matyja Andrzej B.** - Ostracods and Dinoflagellate cysts in Purbeck-Facies of NW Poland (Rzeczyn PGI-1 borehole)

12.00 **Bulot L. G., Frau C. and Wimbledon W.A.P.** - New data on Himalayitidae and Berriasellidae around the J/K boundary at Le Chouet and Les Combes (Drôme, SE France)

12.20 **Pszczółkowski Andrzej, Jerzy Lefeld & Jacek Grabowski** - Late Tithonian? - Berriasian ammonites from the Bobrowiec tectonic unit in the Western Tatra Mountains

12.40 **Gaździcka Elżbieta** - Early Berriasian appearance of *Berriasella (Picteticeras) picteti* (Jakob) in Tethyan Province

13.00 – 14.00 Lunch

14.00 **Michalik Jozef** - Correlations of West Carpathian sections across the J/K Boundary

14.20 **Grabowski Jacek** - Magnetostratigraphy of the J/K boundary sections part I: Strapkova (Pieniny Klippen Belt, Slovakia) and Barlya (Western Balkan, Bulgaria)

14.40 **Schnabl Petr** - Magnetostratigraphy of the J/K boundary sections part II: Durlston Bay (England), Les Combes (Vocontian Trough, France), Beni Kleb (Tunisia).

15.00 **Krobicki Michal** - The earliest Berriasian volcanogenic event in Veliky Kamenets section (Transcarpathian Ukraine) – case study and its relation to other volcanogenic occurrences in Ukraine-Romania transborder zone

15.20 **Lakova Iskra** - Biostratigraphy and carbonate microfacies of the pelagic sediments across the J/Cr boundary in Stara Planina – Poreč Zone (eastern Serbia)

15.40 **Rehakova Daniela** - Calpionellids from Garagu river section – preliminary results

16.00 – 16.30 – Coffee Break

16.30 – 17.30 poster presentations:

Arkadiev V., Savelieva J. & Shurekova O. - New data on the Berriasian of Central Crimea: Biostratigraphy

Gusev Vladimir - Current status of Cretaceous key sections in the Samara region, Russia

Platonov Egor - The stratigraphic distribution of tintinnids in a section of the Tithonian-Berriasian in the Eastern Crimea

Schnabl Petr - Kurovice – new locality for biostratigraphy and magnetostratigraphy

Friday, October, 11th

9.00 – 10.00 Open session (discussions, conclusions)

10.00 **Ploch Izabela, Smoleń Jolanta** - Volgian - Ryazanian ostracods and ammonites from the Polish basin (S. Marek and J. Smoleń collection)

11.00 – 11.30 Coffee Break

12.00 – 13.30 Berriasian ammonites from the PKB (A. Wierzbowski collection) and Volgian ammonites (J. Kutek collection) – Faculty of Geology, University of Warsaw

13.30 – 17.00 – Free time with lunch (optional)

17.00 – 19.00 Sightseeing in Warsaw (with tourist guide); meeting point: main entrance to Institute (A building)

19.00 – Conference dinner – “U Barssa” Restaurant (Old Town Market Place)

Saturday, October 12th

8.30 – 16.30 Field trip to Tithonian exposure (quarry in Sławno) - departure in front of PGI – NRI
